Subject: Re: OSHA WoE document for review

Agreed! I'd like to scan it but I think having a few of our folks that worked on the evidence integration section of the Handbook would be good commenters. The few that come to mind are: Glinda, Catherine, Barbara, Andrew Kraft, Vince, and myself. There were likely others on that group but I am blanking on who they were.

Ila, considering what you've been thinking about with arsenic and the IRIS/ISA weight of evidence, you may want to take a look as well.

Samantha

Subject: Fwd: OSHA WoE document for review

Hi everyone: this OSHA document is open for public comment until the end of March. The IOAA would like NCEA to look at it. If we have comments, it would be good to coordinate and have one set, to provide them directly instead of through the public comment process, and if we comment it would be great to let Bob know what we said.

Subject: OSHA WoE

Lynn

Below is the link to the OSHA WoE for hazard classification that Tom mentioned this morning. It is a massive document (+400 page) and in my very quick scan of it, I didn't see anything really remarkable. Despite that, it might be good to have someone in NCEA give it a closer look. It is open for public comment.

Bob
